COPPER MOUNTAIN MINING CORPORATION
(The “Company”)

**MANAGEMENT'S DISCUSSION & ANALYSIS (“MD&A”) OF FINANCIAL
CONDITION & THE RESULTS OF OPERATIONS FOR THE NINE MONTHS ENDED
SEPTEMBER 30, 2007**

May 28, 2008

Introduction

Management’s discussion and analysis (“MD&A”) focuses on significant factors that affected Copper Mountain Mining Corporation’s performance and such factors that may affect its future performance. In order to better understand the MD&A, it should be read in conjunction with the unaudited consolidated financial statements for the three months ended March 31, 2008 and the Company’s 2007 audited consolidated financial statements and the related notes contained therein. The Company reports its financial statements in accordance with Canadian generally accepted accounting principles (“Canadian GAAP”) The Company’s significant accounting policies are set out in Note 2 of the audited consolidated financial statements for the year ended December 31, 2007. The Company’s financial statements and the management’s discussion and analysis are intended to provide a reasonable base for the investor to evaluate the Company’s exploration results and financial situation. Additional information on the Company is available and can be found at www.sedar.com or www.CuMtn.com.

Overview – March 31, 2008

The Company recorded net income of \$2,245,449 or \$0.10 per share for the three months ended March 31, 2008. In order to better understand Copper Mountain’s financial results for the three months ended March 31, 2008, it is important to gain an understanding of the stage of development of the Company’s only asset, the Copper Mountain Project.

The Company owns 100% of Similco Mines Ltd. and is conducting an extensive exploration drill program on the property. Drilling is expected to continue throughout 2008. A total of 50,000 meters is expected to be drilled during 2008. A summary of the intersections from drill-holes announced have been posted on the Company’s web site. The Company currently has five drills on the property drilling 24 hours per day, seven days a week. In addition, the Company is continuing to proceed with a feasibility report that is expected to be completed in the first half of 2008. Part of this Feasibility Study will be an updated 43-101 compliant technical resource report based on drilling up to December 20, 2007.

Basis of Presentation

The accompanying financial statements of Copper Mountain Mining Corporation have been prepared by management in accordance with GAAP.

Forward Looking Statements

The MD&A contains forward-looking information which involves risk and uncertainties including but not limited to changes in exchange rates, commodity prices, interest rates and operating uncertainties encountered in the mining business. Forward looking information typically contain statements with the words such as “expect”, “believe”, “plan”, “forecast”, “intend”, “targets”, “budgets” or similar words suggesting future outcomes. Because of these risks and uncertainties, the actual results could be materially different than those currently anticipated by the Company.

Critical Accounting Policies

A summary of significant accounting policies is presented in Note 2 to the consolidated financial statements for the year ended December 31, 2007 and for the three months ended March 31, 2007 included in the Company’s prospectus filed on Sedar.

Critical Accounting Estimates

Preparing financial statements in accordance with GAAP requires management to make certain judgments and estimates. Changes to these judgments and estimates could have a material effect on the Issuer’s financial statements and financial position.

The carrying value of expenditures incurred in a development stage company like Copper Mountain is subject to an impairment evaluation. All of the expenditures incurred to date on the Copper Mountain Project have been capitalized. It is management’s opinion that the estimated cash flows expected to result from the future use of the property and its eventual disposition will exceed its carrying amount.

Results of Operations

The Company recorded net income of \$2,245,449 or \$0.10 per share for the three months ended March 31, 2008 as compared to net income of \$239,345 for the three months ended March 31, 2007. The increase in net income for the quarter is mainly attributable to the Company renouncing \$7,215,000 in exploration expenditures during the quarter, which under GAAP is taken into income and resulted in a recovery of future income taxes of \$2,461,758. In addition, the Company had interest and other income of \$82,344 during the quarter as compared to \$19,433 for the period ended March 31, 2007. This increase in interest and other income is a result of having a larger cash balance on hand during the quarter ended March 31, 2008 as compared to March 31, 2007.

Professional fees, which consist of accounting, audit, and legal fees, were \$37,435 for the three months ended March 31, 2008 as compared to \$19,625 for the three months ended March 31, 2007. The Company also incurred consulting fees of \$48,828 during the quarter as compared to \$22,500 in the comparative period. This increase is a result of increased consulting time required to support the activities of the Company. Advertising, shareholder communications, and travel totalled \$29,943, \$15,944 and \$25,241 respectively for the three months ended March 31, 2008 as compared to nil, \$3,680 and \$1,022 for the period ended March 31, 2007. This increase in costs is directly related to the increased investor relations activities of the Company since

becoming a public company in June 2007. Other expenses recorded for the three months ended March 31, 2008, included salaries and wages of \$57,080, bank charges of \$6,927, meals and entertainment costs of \$7,235 as compared to salaries and wages of \$11,054, bank charges of \$1,397 and meals and entertainment of \$490 for the three months ended March 31, 2007. The increase in wages during the quarter is a result of the Company hiring additional personnel mid year 2007. 77

General and Administrative expenses were \$63,055 for the three months ended March 31, 2008 as compared to \$14,276 for the three months ended March 31, 2007. General and Administrative increases is a result of the increased support activity of the Company as the Company advances the Copper Mountain project.

During the period, \$2,906,111 in exploration expenditures was spent on the property and was deferred. The \$2,906,111 in deferred costs were made up of drilling costs of \$1,418,581, costs of the feasibility study during the quarter totalled \$826,999, geological consulting costs of \$109,048, core cutting costs of \$32,378, contract labour costs of \$21,528, assay costs of \$102,511, equipment rental costs of \$14,529, claims fees of \$182,930, salaries of \$93,831, surveying \$6,767, amortization costs of \$61,545, travel of \$21,735, house rental for accommodating our workers on site, of \$3,000, utilities of \$1,393, and miscellaneous costs of \$9,336.

Liquidity and Capital Resources

As of March 31, 2008 the Company had working capital of \$3.5 million (comprised of \$3.6 million of cash, \$1.0 million of receivables, and prepaid expenses offset by \$1.1 million of current liabilities) as compared to a working capital of \$6.5 million at December 31, 2007 (comprised of \$6.1 million of cash, \$1.1 million of receivables, prepaid expenses and amounts due from a related party offset by \$0.7 million of liabilities). The decrease in working capital is a result of the fact that the Company currently has no operating project and while the Company continues to advance the Copper Mountain Project it will rely on the equity and debt markets to fund future expenditures. The Company believes that it will continue to access the capital markets over the next year to meet the capital requirements of the Copper Mountain Project.

Related Party Transactions

During the period, except as disclosed elsewhere in this MD&A, all transactions with related parties have occurred in the normal course of the Company's operations and have been measured at their fair value as determined by management. During the period, the Company paid consulting, management, and geological fees of \$109,350 to three different companies controlled by three officers of the Company (2007 - \$48,699). The Company advanced a further \$600,000 to Compliance Energy Corporation ("TSX-V: CEC") as a secured demand loan bearing an interest rate of prime plus 1% during the quarter. The Company recorded \$6,750 in interest receivable related to this demand loan. On March 13, 2008 Compliance Energy repaid \$600,000 of this demand loan. Compliance is related by way of common directors and officers.

Selected Quarterly Financial Information

The following table is selected quarterly financial information derived from the Company's financial statements.

Quarter	Revenue	Net Income (Loss)	Basic Income (Loss) per Share	Fully Diluted Income (Loss) Per Share

⁽¹⁾Company was incorporated on April 20, 2006

* After adjustment for deferred costs during the period

Risks and Uncertainties

The Company's success depends on a number of factors, some of which are beyond the control of the Company. Typical risk factors include copper, gold and silver price fluctuations and operating uncertainties encountered in the mining business. Future government, legal or regulatory changes could affect any aspect of the Company's business, including, among other things, environmental permitting and taxation costs and the ability of the Company to develop an independent power project. These risks and uncertainties are managed in part, by experienced managers, advisors and consultants, maintaining adequate liquidity, and by cost control initiatives.

Disclosure Controls

Disclosure controls and procedures are designed to provide reasonable assurance that material information is gathered and reported to senior management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate, to permit timely discussions regarding public disclosures. Management, including the Chief Executive Officer and the Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of September 30, 2007. Based on this evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Company's disclosure controls and procedures, as defined in Multilateral Instrument 52-109 - *Certification of Disclosure in Issuers' Annual and Interim Filings*, are effective to ensure that information required to be disclosed in reports that we file or submit under Canadian securities legislation are recorded, processed and reported within the time period specified in those rules.

Supplementary cash flow information

During the three months ended March 31, 2008, the Company deferred \$61,545 of amortization costs on vehicles and mining equipment. Also during the three months ended March 31, 2008 the Company paid \$5,918 in interest costs on leased mining equipment and vehicles. As at March 31, 2008, there was \$678,536 in accounts payable that related to mineral properties.

During the three months ended March 31, 2007, the Company deferred \$60,841 of amortization costs on vehicles and mining equipment.

The accompanying notes are an integral part of this financial statement

COPPER MOUNTAIN MINING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2008 AND 2007 (UNAUDITED)

1. NATURE AND CONTINUANCE OF OPERATIONS

The Company was incorporated under the provisions of the British Columbia *Company Act* on April 20, 2006 as Copper Mountain Mining Corporation. On December 22, 2006 the Company acquired all of the issued and outstanding common shares of Similco Mines Ltd. ("Similco"), a private company also incorporated under the provisions of the British Columbia *Company Act*.

These consolidated financial statements include all of the accounts of the Company and its wholly-owned legal subsidiary Similco. All significant intercompany balances and transactions have been eliminated on consolidation.

These consolidated financial statements have been prepared on a going concern basis, which assumes the ongoing capacity of the Company to realize on its assets and discharge of liabilities in the normal course of business. The Company's status as a going concern is dependent on its ability to generate future profitable operations and to receive continued financial support from its lenders and shareholders. Management is of the opinion that sufficient working capital will be obtained from operations and external financing to meet the Company's liabilities and values and classifications of assets and liabilities would change and those changes could be material. It is not possible to predict the outcome of those matters at this time.

2. SIGNIFICANT ACCOUNTING POLICIES

Consolidation

These consolidated financial statements include the accounts of the company and its wholly owned subsidiary, Similco Mines Ltd. All significant intercompany transactions have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the period. Actual results may differ from those estimates.

Earnings per Share

The Company uses the treasury stock method to compute the dilutive effect of options, warrants and similar instruments. Under this method the dilutive effect on earnings per share is recognized on the use of proceeds that could be obtained upon exercise of options, warrants and similar instruments. It assumes that the proceeds would be used to purchase common shares at the average market price during the year.

Mineral Properties

The Company records its interests in mineral properties and all direct expenditures incurred on them at cost. All direct and indirect costs relating to the acquisition of these interests are capitalized on the basis of specific claim blocks or areas of geological interest until the properties to which they relate are placed into production, sold or management has determined there to be an impairment in value. These costs will be amortized on the basis of units produced in relation to the proven reserves available on the related property following commencement of production or charged to operations in the year of abandonment or sale. Mineral properties which are sold before that property reaches the production stage will have all revenues from the sale of the property credited against the cost of the property. Properties which have reached the production stage will have a gain or loss calculated based on the portion of the property sold.

COPPER MOUNTAIN MINING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2008 AND 2007 (UNAUDITED)

2. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Mineral Properties *(continued)*

The recorded cost of mineral exploration interests is based on cash paid, the value of any common share consideration issued and exploration costs incurred. The recorded amount may not reflect recoverable value as this will be dependent on the development program, the nature of the mineral deposit, commodity prices, adequate funding and the ability of the Company to bring its projects into production.

Property, Plant and Equipment

Equipment and building are recorded at a cost and amortized over their estimated useful economic lives on the straight-line basis. The estimated economic lives are 5 years for automobiles, equipment and furniture and 25 years for buildings.

Financial Instruments

The Company's financial instruments consist of current assets and liabilities, the fair values of which approximate their carrying values due to the short-term nature of the items. The Company's reclamation bond is a term deposit lodged with a bank to secure the Company's accrued site reclamation costs.

Flow-through shares

The Company may issue securities referred to as flow-through shares, whereby the investor may claim the tax deductions arising from the expenditure of the proceeds. When resource expenditures are renounced to the investors and the Company has reasonable assurance that the expenditures will be completed, future income tax liabilities are recognized (renounced expenditures multiplied by the effective corporate tax rate), and share capital is reduced. Previously unrecognized tax assets may then offset or eliminate the liability recorded.

Income taxes

The Company accounts for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Future tax assets and liabilities are measured using tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be settled. When the future realization of income tax assets does not meet the test of being more likely than not to occur, a valuation allowance in the amount of the potential future benefit is taken and no net assets are recognized. Such an allowance has been applied to all potential income tax assets of the Company.

Share Capital

Common shares issued for non-monetary consideration are recorded at their fair market value on the date of the agreement to issue the shares.

Stock-based Compensation

The Company measures and records compensation expense in connection with stock options granted using the fair value method, and records the expense when the options vest with the recipients. Any consideration paid on the exercise of stock options is credited to share capital.

Asset Retirement Obligations

The fair value of a liability for an asset retirement obligation is recognized on an undiscounted cash flow basis when a reasonable estimate of the fair value of the obligation can be made. The asset retirement obligation is recorded as a liability with a corresponding increase to the carrying amount of the long-lived asset. Subsequently, the asset retirement cost is allocated to expense using a systematic and rational method and is adjusted to reflect period-to-period changes in the liability resulting from the passage of time and from revisions to expected payment dates of the obligation amount.

COPPER MOUNTAIN MINING CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2008 AND 2007 (UNAUDITED)

2. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Capital Risk Disclosure

The Company's objective in managing its capital, which is comprised of cash and instruments which are capable of being converted to cash, is to safeguard all cash resources by investing in government or bank instruments which can be liquidated promptly and which yield acceptable rate of return, and to issue from its treasury, shares, warrants and options which can be converted to cash. Treasury issuances of shares and warrants are part of the Company's capital raising process and are issued when cash is required, ideally under favourable market conditions, and with regard to dilution of the Company's capital structure. The exercise of warrants and options are not under the control of the Company's management. All capital transactions are subject to approval of the Company's directors. The Company is not subject to any regulatory capital requirements.

Financial Risk

The Company's financial instruments are comprised of cash, amounts receivable and payables. The Company does not have any currency risk as all of its operations are in Canada, credit risk is minimized by keeping all cash in Canadian Banks, and liquidity risk is minimized by maintaining all instruments in short term paper.

Accounting Policies Not Yet Adopted

The following pronouncements recently issued by the Canadian Institute of Chartered Accountants ("CICA") will likely impact the Company's future accounting policies:

(i) Goodwill and intangible assets:

In February 2008, the CICA issued Handbook Section 3064, Goodwill and Intangible Asset effective for interim and annual periods on or after October 1, 2008. Section 3064, which replaces Section 3062, Goodwill and Other Intangible Assets, and Section 3450, Research & Development Costs, establishes standards for the recognition, measurement and disclosure of goodwill and intangible assets. The provisions relating to the definition and initial recognition of intangible assets, including internally generated intangible assets, are equivalent to the corresponding provisions of IFRS IAS 38, Intangible Assets. This new standard is effective for the Company's interim and annual financial statements commencing on October 1, 2008. The Company is assessing the impact of the new standard on its financial statements.

(ii) International Financial Reporting Standards ("IFRS")

In February 2008 the Canadian Accounting Standards Board announced 2011 as the changeover date for publicly-listed companies to use IFRS, replacing Canada's own generally accepted accounting principles. The specific implementation is set for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require restatement for comparative purposes of amounts reported by the Company for the year ended December 31, 2010. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

(f) Escrowed Shares

As required by the TSX Venture Exchange, a total of 4,854,250 common shares owned by directors and officers of the Company are subject to an escrow agreement. 4,394,250 of these escrowed shares are to be released in installments of 15% every six months.

6. RELATED PARTY TRANSACTIONS

All transactions with related parties have occurred in the normal course of the Company's operations and have been measured at their fair value as determined by management. The balances payable are non-interest bearing and have no fixed terms for repayment.

- During the period ended March 31, 2008, the Company advanced \$600,000 to Compliance Energy Corporation ("Compliance") as a demand loan secured by the equivalent value of common shares of the Company owned by Compliance, with the loan bearing an interest rate of prime plus 1%. This is in addition to the \$600,000 advanced to Compliance in 2007. On March 13, 2008 Compliance repaid \$600,000 of the demand loan. Compliance is a public company, listed on the TSX Venture Exchange and related by certain common directors and officers.
- During the period, the Company paid three of its officers consulting, management and geological fees aggregating \$109,350.(2007-\$48,699)
