

Copper Mountain Mining Corporation (CMMC) is a TSX/ASX listed copper producer, developer and explorer in world class mining jurisdictions. Copper Mountain's flagship asset is the 75% owned Copper Mountain mine located in southern British Columbia near the town of Princeton. The Copper Mountain mine produces over 100 million pounds of copper equivalent per year with a large resource that remains open laterally and at depth. Copper Mountain also has the development stage Eva Copper Project in Queensland, Australia, which is expected to add approximately 100 million pounds of copper on an annual basis, in addition to an extensive 210,000 hectare highly prospective land package in the Mount Isa area. Headquartered in Vancouver, BC, Copper Mountain trades on the Toronto Stock Exchange under the symbol "CMMC" and Australian Stock Exchange under the symbol "C6C".

Position

Safety Manager, Eva Copper Project

Location

Brisbane and Cloncurry, Queensland, Australia

Summary

Reporting to the Eva Copper Project Manager, the Safety Manager is responsible for developing and implementing a strong safety culture and leading safety programs across the Project.

Key Responsibilities

- Lead the development and implementation of CMMC health and safety policies and procedures across the Eva Copper Project.
- In partnership with the Project team, promote and embed a strong health and safety culture across the Project.
- Design and deliver safety training programs, toolbox talks, and health and safety informational awareness sessions.
- Identify requirements and coordinate site and job specific training.
- Perform inspections/workplace audits, investigate incidents, and ensure corrective actions are implemented and tracked to completion.
- Maintain Eva Copper safety statistics and records (including training, incidents and inspections).
- Regularly monitor the safety compliance of all employees and contractors.
- Perform other duties as assigned and required.

Education & Experience

- Post-secondary qualifications in health and safety.
- Minimum of 8 – 10 years' experience in health and safety within the mining industry.
- Formal training in recognized incident investigation processes.
- Solid understanding of Queensland Mining and Quarrying Safety and Health Regulations.

Required Skills

- Excellent oral and written communication skills, including the ability to present ideas clearly.
- Ability to take initiative and work independently as well as across different levels of the organization.
- Ability to work in a fast-paced, dynamic environment managing multiple priorities under tight deadlines.
- Good liaison skills to engage with safety regulators and agencies.
- Strong leadership skills.
- Strong attention to detail and exceptional organizational skills
- Ability to identify key technical and business issues and develop innovative solutions.
- High degree of business acumen and ability to think strategically.
- Proficient computer skills, with advanced knowledge of Microsoft Office applications (Power Point, Word, Excel) and ability to learn new software.
