

Copper Mountain Mining Corporation (CMMC) is a TSX/ASX listed copper producer, developer and explorer in world class mining jurisdictions. Copper Mountain's flagship asset is the 75% owned Copper Mountain mine located in southern British Columbia near the town of Princeton. The Copper Mountain mine produces over 100 million pounds of copper equivalent per year with a large resource that remains open laterally and at depth. Copper Mountain also has the development stage Eva Copper Project in Queensland, Australia, which is expected to add approximately 100 million pounds of copper on an annual basis, in addition to an extensive 210,000 hectare highly prospective land package in the Mount Isa district. Headquartered in Vancouver, BC, Copper Mountain trades on the Toronto Stock Exchange under the symbol "CMMC" and Australian Stock Exchange under the symbol "C6C".

Become a Part of Our Team

As we continue to grow Copper Mountain Mining Corporation, there are many career development opportunities available for motivated and goal-oriented individuals.

Work with us and you will benefit from the mentorship and guidance of experienced professionals because we understand that in order to accomplish our goals, we must work as a team and rely on the effort of every team member.

Position

Senior Project Geologist

Location

Vancouver, BC with travel as required to the Copper Mountain Mine and other exploration locations.

Summary

To support the growth of our business, we are seeking a Senior Project Geologist to join our Exploration and Geoscience team.

The Senior Project Geologist will be responsible for the ingestion, analysis, and interpretation of geoscience data from Copper Mountain and other projects, including data from third party evaluations. The position will use a range of industry software, to create GIS projects and 3D geological models across a range of scales from individual ore body models to district and regional compilations. The position will assist with the curation of geoscience data from multiple sources, including drilling, geophysical, geochemical and remote sensing data.

Key Responsibilities

- Provide support in the collection, analysis, and interpretation of geoscience data from multiple sources and projects.
- Provide analysis and interpretation of geoscience data using industry software (such as Acquire, QGIS, and Leapfrog Geo) and guided by strong geological and ore deposit genesis knowledge.

- Maintain good communication with Exploration and Geoscience team members and personnel at the Copper Mountain mine to optimize work programs, geoscience data collection and the transfer and dissemination of geoscience work products.
- Ensure geoscience data are curated and stored in a consistent and efficient manner.
- Facilitate communication between in-house and independent commercial labs to ensure efficient analysis workflows and data transfer.
- Provide assistance as required to resource/reserve updates, ore body characterization studies, and other mine geology work.
- Support statutory reporting as required.
- Assist with supervision of drilling and other geological field programs as required.
- Other duties as required.

Education & Experience

- Bachelor of Science Degree in Geology, Earth Sciences, or equivalent.
- 5-10 years experience in exploration or mining with strong geological knowledge and geoscience software skills.

Required Skills

- Safety oriented, with a focus on taking care of yourself and those around you.
- Detail-oriented, and a team player with good interpersonal communication, analytical, organization, and time management skills.
- Excellent oral and written communication skills, including the ability to present ideas clearly.
- Ability to work collaboratively in a multi-disciplinary team environment.
- Strong working knowledge of geoscience database, geological modelling and GIS software, such as AcQuire, Leapfrog Geo and QGIS.
- Knowledge of geoscience data management best practices
- Proficient computer skills, with advanced knowledge of Microsoft Office applications (Power Point, Word, Excel) and ability to learn new software.

To apply, please send your cover letter and resume to hr@cumtn.com. Please include '**Senior Project Geologist**' in the subject line of your email response.

While we thank all applicants for their interest, only those selected for an interview will be contacted.
