

WHY CHOOSE COPPER MOUNTAIN MINE?

The mine is located approximately twenty kilometers south of the community of Princeton, British Columbia at the center of the Similkameen Valley. Princeton offers a variety of activities for every season. The Kettle Valley Railway makes up part of the TransCanada trail that goes right through town. The area boasts miles of trails for hiking, off road vehicle fun, includes plenty of lakes for fishing, kayaking, and camping. The community offers something for everyone and interests, such as golfing, yoga, karate, highland dance, curling, bowling and hockey. You have proximity to both the Lower Mainland and the Okanagan within in a two-hour or less drive that offers a variety of fun-filled activities. Princeton quickly become a popular place to call home. If you like working with people in a diverse fast-paced environment that offers a work-life balance unlike that of the big city; this could be the opportunity for you. Our power is through our people, our teams, bringing the right skills together to achieve higher performance, productivity, and reward.

WHAT'S THE JOB?

At Copper Mountain Mine, we see our environmental responsibilities as an integral component in our operations requiring a conscientious effort to minimize our environmental footprint. We are committed to achievable Health and Safety standards. We prioritize Aboriginal and Community Outreach. We have a robust development and organic growth pipeline highlighting with our Princeton, BC mine as our flagship asset producing 100 million pounds of copper equivalent per year. We understand that is our people who bring a blend of skills and experience that see every problem having a solution and leverages that mix of talent

As a **Red Seal Millwright (Job Code 2021-086)**, reporting to the Mill Maintenance Supervisor, you will provide full oversight of preventative maintenance services and repairs, troubleshooting, diagnosis and creation of services plans. Troubleshooting will take place in the field and the shop as required and as determined by the maintenance supervisor.

Your work will include:

- Perform mechanical preventative maintenance and repairs working within the Mill Maintenance team
- Working safely to repair and maintain all milling equipment within the mill building, internal and external tailings system equipment, pumping systems for underground water and fresh water supply
- Self-starter and be able to work with minimal supervision

WHAT'S IN IT FOR YOU?

- Part of Net zero by 2035 aligned with the Paris Agreement.
- Strong foundation with sustainable copper growth.
- Long life assets, low risk and high returns.
- Career advancement opportunities.
- Strength in a diverse and inclusive workforce
