

Senior Mining Engineer

Copper Mountain Mining Corporation is a TSX/ASX listed copper producer, developer, and explorer in world class mining jurisdictions. Copper Mountain's flagship asset is the 75% owned Copper Mountain mine located in southern British Columbia near the town of Princeton. The Copper Mountain mine has a +30 year mine life based on resources and produces over 100 million pounds of copper equivalent per year with exceptional upside.

The Company also has the development-stage Eva Copper Project in Queensland, Australia in addition to an extensive 210,000 hectare highly prospective land package in the Mount Isa district. Headquartered in Vancouver, BC, Copper Mountain trades on the Toronto Stock Exchange under the symbol "CMMC" and Australian Stock Exchange under the symbol "C6C".

Become a Part of Our Team

As we continue to grow Copper Mountain Mining Corporation, there are many career development opportunities available for motivated and goal-oriented individuals.

Work with us and you will benefit from the mentorship and guidance of experienced team members because we understand that in order to accomplish our goals, we must work as a team and rely on the effort of every team member.

Position

Senior Mining Engineer

Location

Copper Mountain Mine is located near the town of Princeton, British Columbia at the center of the scenic Similkameen Valley. Princeton is a community-oriented town with a diverse offering of activities, especially for those who love the outdoors. Princeton is also in close proximity to both the city of Vancouver and the Okanagan.

Summary

Reporting to Chief Engineer, the Senior Mine Engineer is responsible for mine planning projects, mine design, economic analysis, and coordination with other departments.

Responsibilities

- Optimize truck shovel operation to maximize production and minimize operating costs at all times.
- Work with the Chief Engineer to develop Life of Mine, Long Range Mine Plans, and pertaining presentations and documentation, and provide support for related capital forecasting and cost modeling.
- Create a mine plan schedule that includes production targets, major, and support equipment hours, requirements, and operating days.
- Ensure mine designs are harmonized with geotechnical, environmental, and other related considerations.

- Perform economic analysis and cost estimating as well as assist with production and cost reporting and tracking.
- Build detailed costing models to evaluate mining options.
- Develop project schedules, budget, risk register, and appropriate requests, and track and compare to previous plans.
- Contribute to project design work as required.
- Manage projects and contractors of various mine planning projects.
- Integrate and communicate with other site groups to develop the best overall plan.
- Perform other responsibilities as required or as assigned.

Education & Experience

- Bachelor's Degree in Engineering with Mining; equivalent combination of education and mine engineering experience also considered.
- Minimum seven years of experience, with progressive experience in short, medium, and long-range planning.
- Registered as a Professional Engineer in Canada, with the ability to register as a member of the Engineers and Geoscientists British Columbia (EGBC).
- Previous experience in open pit, truck and shovel operations.
- Experience conducting feasibility studies and cost estimates.

Required Skills

- Flexibility and creativity in dealing with scheduling, mine planning, and other complex issues.
- Experience working on projects, overseeing, coordinating, and communicating with multiple internal resources and external contractors.
- Experience in planning drilling and blasting in a mine operation setting, including pattern and tie-in design, drill schedule, and blast coordination.
- Strong computer skills in Microsoft Office Suite: Outlook, Word, Excel, and PowerPoint.
- Extensive experience in utilizing appropriate mine planning, design, and scheduling software packages.
- Exceptional interpersonal, oral, and written communication skills.
- Strong analytical, and problem-solving skills and comfortable making recommendations.
- Ability to multi-task and work in a fast-paced environment.
- Capacity to work in a self-directed manner and possess good time management skills.
- Ability to work collaboratively with others in a technical team-based environment.
- Demonstrated ability to work well with people at all levels of the organization, and ability to influence outcomes, and ability to manage conflict.
- Strong leadership skills, including the ability to manage a diverse team to effectively leverage skillsets and provide additional support where necessary.

To Apply

To apply, please send your cover letter and resume to humanresources@cumtn.com. Please include **'Senior Mining Engineer'** in the subject line of your email response.

Copper Mountain Mine is an equal opportunity employer committed to diversity, equity, and inclusion. While we consider all qualified applicants for employment and thank all applicants for their interest, only those selected for an interview will be contacted.
