

Production Metallurgist

Copper Mountain Mining Corporation is a TSX/ASX listed copper producer, developer, and explorer in world-class mining jurisdictions. Copper Mountain's flagship asset is the 75% owned Copper Mountain mine located in southern British Columbia near the town of Princeton. The Copper Mountain mine has a +30-year mine life based on resources and produces over 100 million pounds of copper equivalent per year with exceptional upside.

The Company also has the development-stage Eva Copper Project in Queensland, Australia in addition to an extensive 210,000 hectare highly prospective land package in the Mount Isa district. Headquartered in Vancouver, BC, Copper Mountain trades on the Toronto Stock Exchange under the symbol "CMMC" and the Australian Stock Exchange under the symbol "C6C".

Become a Part of Our Team

As we continue to grow Copper Mountain Mining Corporation, there are many career development opportunities available for motivated and goal-oriented individuals.

Work with us and you will benefit from the mentorship and guidance of experienced team members because we understand that in order to accomplish our goals, we must work as a team and rely on the effort of every team member.

Position

Production Metallurgist

Location

Copper Mountain Mine is located near the town of Princeton, British Columbia at the center of the scenic Similkameen Valley. Princeton is a community-oriented town with a diverse offering of activities, especially for those who love the outdoors. Princeton is also in close proximity to both the city of Vancouver and the Okanagan.

Summary

Reporting to the Chief Metallurgist, the Production Metallurgist is an integral member of the mill department providing technical support to mill operation supervisors and operators. This will involve an active role in mill production surveillance and following up on requirements to achieve copper production across the mill department with an accountable role in determining production issues or challenges and providing support to overcome them. The Production Metallurgist is an exciting opportunity to integrate technical services into the day-to-day operations.

Responsibilities

- Production support to operations in troubleshooting and optimizing operational circuits to achieve production targets.
 - Support mill operation supervisors in providing technical surveillance and response across the mill operation.
 - Working alongside circuit operators to highlight successes and work collaboratively to capture opportunities to achieve operational targets

- Conducting run of mill flotation tests to provide feedback to the operation on lab vs. plant performance to assist in understanding flotation performance.
- Daily mill performance summaries (dayshift and nightshift operation) and weekly mill performance summaries (per crew rotation)
- Facilitate technical crossover information between dayshift and nightshift operation and crew rotation changes.
- Working alongside Mill Metallurgists to provide operational background and guidance on short and long term challenges that may require additional resources
 - AwaRE performance analysis
 - Circuit specific maintenance support
 - Downtime reasoning and issues
- Mill and crusher shutdown support with respect to the completion of routine inspections
- Month End inventory reconciliation
- Support metallurgical trials, pilot plants and commissioning of new processing equipment
- Perform other duties as required.

Education & Experience

- Minimum 1 years' experience in Metallurgy or related industrial field.
- Working knowledge of principles and methods used in metallurgical and processing analysis and exposure to using analytical/statistical tools
- Previous metallurgy laboratory and project management experience is preferred.
- Possesses a valid Class 5 British Columbia driver's license.

Required Skills

- Have excellent written and verbal communication skills with all levels of the operation,
- Strong communicator, abilities with task prioritization, multitasking, use of timelines and time management techniques
- Strong computer skills including Microsoft Office Suite and Maximo,
- Excellent interpersonal skills with the ability to work collaboratively with all other levels of the operation,
- Required to meet the pre-employment testing requirements.

To Apply

To apply, please send your cover letter and resume to humanresources@cumtn.com. Please include **'Production Metallurgist'** in the subject line of your email response.

Copper Mountain Mine is an equal opportunity employer committed to diversity, equity, and inclusion. While we consider all qualified applicants for employment and thank all applicants for their interest, only those selected for an interview will be contacted.
