

## **Production Geologist**

Copper Mountain Mining Corporation is a TSX/ASX listed copper producer, developer, and explorer in world-class mining jurisdictions. Copper Mountain's flagship asset is the 75% owned Copper Mountain mine located in southern British Columbia near the town of Princeton. The Copper Mountain mine has a +30-year mine life based on resources and produces over 100 million pounds of copper equivalent per year with exceptional upside.

The Company also has the development-stage Eva Copper Project in Queensland, Australia in addition to an extensive 210,000 hectare highly prospective land package in the Mount Isa district. Headquartered in Vancouver, BC, Copper Mountain trades on the Toronto Stock Exchange under the symbol "CMMC" and the Australian Stock Exchange under the symbol "C6C".

### **Become a Part of Our Team**

As we continue to grow Copper Mountain Mining Corporation, there are many career development opportunities available for motivated and goal-oriented individuals.

Work with us and you will benefit from the mentorship and guidance of experienced team members because we understand that in order to accomplish our goals, we must work as a team and rely on the effort of every team member.

### **Position**

#### **Production Geologist**

### **Location**

Copper Mountain Mine is located near the town of Princeton, British Columbia at the center of the scenic Similkameen Valley. Princeton is a community-oriented town with a diverse offering of activities, especially for those who love the outdoors. Princeton is also in close proximity to both the city of Vancouver and the Okanagan.

### **Summary**

Reporting to the Senior Geologist, the Production Geologist is responsible for day-to-day short-term mine geology tasks and determining the flow of material from the mine as well as providing ore control boundaries to the mine planners.

This is a permanent full-time role on a 7x7 rotation, 12-hour day shifts, unless exceptional circumstances. The schedule could change to meet operational requirements.

### **Responsibilities**

- Inspect blast hole cuttings,
- Ensures that ore control staking is correct,
- Performs field mapping of lithological boundaries and sampling of active faces,

- Compile and validate assay data from blast holes and perform the necessary QAQC checks.
- Supports diamond and RC drilling activities, monitors drilling progress, and interprets drill chips.
- Compiles mapping and assay information in 3-D software and correlates it with existing models,
- Assist with ore feed strategies to the primary crusher to provide optimal grade ore to the mill.
- Prepares weekly and monthly reports as required,
- Performs weekly and monthly reconciliation for model performance and impacts on grade,
- Blast movement monitoring and blast design inputs,
- Ensure ML/ARD management principles are followed, and correct litho-geochemical zones are identified,
- Performs any other responsibilities related to the role or as assigned by the department head.

### **Education & Experience**

- Bachelor's Degree in Geology, Earth Sciences, or equivalent,
- 2-5 years of experience working as a geologist in a mining environment,
- Experience in porphyry copper-gold deposit geology would be considered an asset,
- Familiarity with logging diamond core and RC chips is considered an asset,
- Working knowledge of Geovia Surpac 3D software or similar industry-standard software is considered an asset,
- Proficiency with Microsoft Office applications required,
- Valid driver's license.

### **Required Skills**

- Verbal and written proficiency in English,
- Demonstrated ability to be effective in a high-paced, dynamic, multi-tasking work environment,
- Have high regard for personal safety and the safety of company property and employees,
- Ability to work in and with cross-functional teams,
- Ability to collaborate with other support groups.

### **Working Conditions**

- Work closely with other engineering team members and collaborate closely,
- Be required to perform computer-based functions combined with field work daily,
- Work requires the employee to wear the appropriate personal protective equipment (PPE),
- Frequent exposure to changing weather conditions,
- Work requires the employee to perform physical tasks like walking on uneven surfaces, standing for periods of time, and lifting up to 50 pounds,

### **Other Requirements**

- Successful completion of pre-employment screening requirements and drug & alcohol testing,
- Provide proof of a valid Class 5/7N driver's license,
- Demonstrate eligibility to work in Canada.

**To Apply**

To apply, please send your cover letter and resume to [humanresources@cumtn.com](mailto:humanresources@cumtn.com). Please include **'Production Geologist'** in the subject line of your email response.

Copper Mountain Mine is an equal opportunity employer committed to diversity, equity, and inclusion. While we consider all qualified applicants for employment and thank all applicants for their interest, only those selected for an interview will be contacted.
